

Number of 2011 – 2012 Seasonal Influenza Vaccine Doses For Children 6 Months Through 8 Years of Age¹

- This simplified approach is only possible because the 2011–2012 influenza vaccine contains the identical 3 influenza virus strains used last year in the 2010–2011 vaccine.
- The number of doses to be given is determined on the basis of the child's age at the time of the first dose.
